Microwave oven	:	Sharp Carousel, Double grill Convection
Cook top	:	Smeg Electric
Exhaust fan	:	Smeg

ENTERTAINMENT EQUIPMENT

Aft cabins	:	
Master Cabin	:	
Saloon	:	
Cockpit	:	

GENERAL DESCRIPTION

Boarding via the Aft Swim Platform finds laid teak decks with stairs to port leading up the main deck entertaining area. This is a large area with teak deck and completely surrounded with stainless steel rails and bulwarks. There are complete Vyback clears to give protection when needed.

At the swim platform there is swim ladder and also a hot / cold shower to starboard.

Moving forward there are side decks to the foredeck area with Vyback clear doors that can be rolled up easily. All decks are teak.

From the aft entertaining area there are either steps up to the flybridge area or to starboard, a lockable sliding door for access to the saloon and interior of the vessel.

The flybridge has a large lounge area of soft cushioned seating (all with covers) and a helm position with all the Nav gear repeated from the lower helm.

There is a large double sun bed aft of the lounge area as well as the stainless steel mast arrangement and then further aft, the tender with stainless steel davit crane.

The vessel interior is via the aforementioned sliding door to starboard on the entertainment deck. Descending 3 steps one enters the saloon area. A dining table and lounge to port for 6 adults and 2 x built in chairs to starboard provide ample indoors seating. Forward on the port side of the saloon is a bar area with Uline bar fridge and also a chart drawer area. Slide out drawers and cabinets hide the glassware and drinks stock.

To starboard and forward in the saloon is the lower helm station with all the associated Nav gear and amenities inc CCTV, stabilizer controls etc. There is also a sliding side door for access to the foredeck. The helm is fronted by 3 large glass windscreen panels all with wipers and shade cloth cover.

Amidships forward of the saloon, between the bar and the helm are stairs to the lower deck fwd accommodation.

Descending these stairs there is a short timber soled corridor with a twin bunk cabin to port, access to a shared bathroom to starboard and the double bed guest cabin in the bow.

The shared bathroom has electric toilet and separate shower. All cabins have portholes and the guest double has a large skylight / hatch.

Aft of the saloon there are stairs descending to the galley which is spacious and open. There is a fridge / freezer, dishwasher, ice box in counter, large double sink, cook top, oven, rangehood, and plenty of bench space.

Aft of the galley is the full beam Master cabin with full ensuite. Plenty of locker space and hanging robes. Two large opening hatches to aft swim platform along with the usual side portholes allow plenty of natural light in to this spacious cabin.

Engine room access is from either forward or aft by way of lifting the stairs at either end of the salon.
